## Introduction:

Recorder Pro is a professional voice recorder. It allows you to record voice memos and on-site sounds at unlimited length with configurable quality. It can be saved in various places like:

- Export to DropBox
- Export to BoxNet
- Export to Sugarsync
- Export to other Apps
- Download and upload directly to PC using local Wi-Fi connection
- send by Email

## Supported Files:

Following file formats are supported by Recorder Pro:

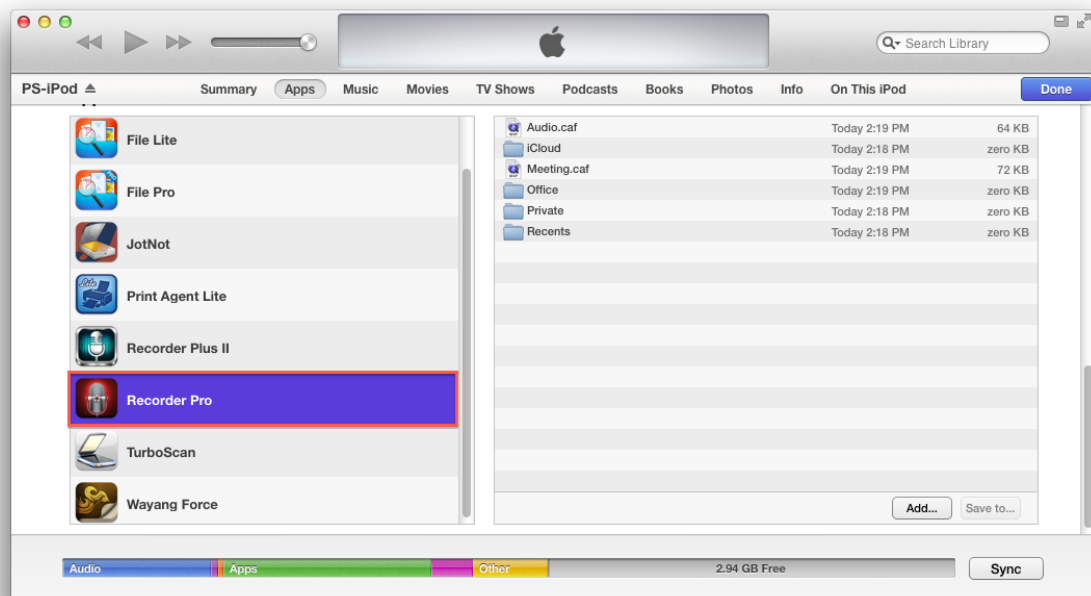

<ul style="list-style-type: none"><li>• CAF</li></ul>
<ul style="list-style-type: none"><li>• WAV</li></ul>
<ul style="list-style-type: none"><li>• MP3</li></ul>
<ul style="list-style-type: none"><li>• AAC</li></ul>
<ul style="list-style-type: none"><li>• Apple Lossless</li></ul>
<ul style="list-style-type: none"><li>• Video (standard iPhone format: H.264, MPEG-4)</li></ul>

# File Transfer:

## Transfer of files via USB

Recorder Pro support iTunes USB File Sharing. To transfer your files follow the steps below:

- Connect your device with PC/Mac via USB cable.
- Open iTunes and click on device name in the left column.
- Click on the Apps tab and scroll it to the very bottom.
- Locate mouse to Recorder Pro at side bar.
- Now, You can Drag and Drop Files into Recorder Pro document list or click “ADD” button to use file section dialog.

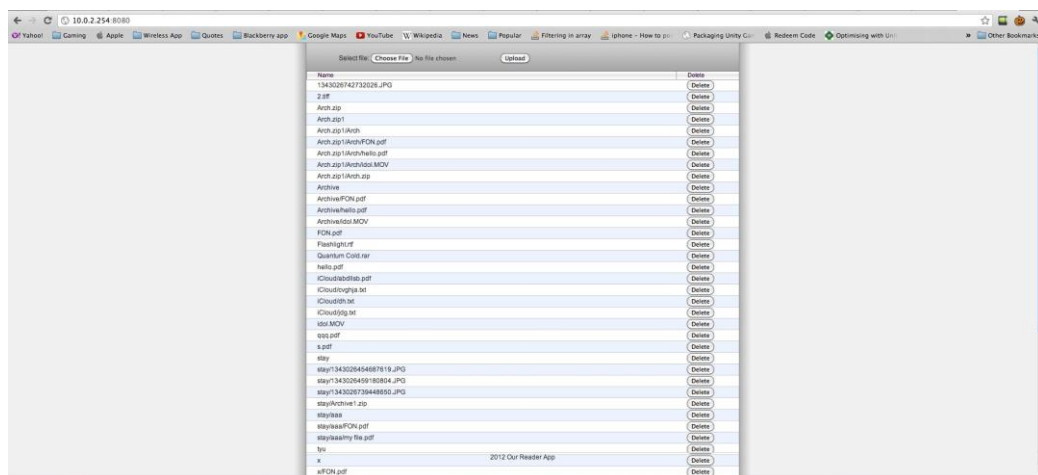

**NOTE:** You cannot copy the Private Folder Files.

## Transfer with Wi-Fi

1. Tap the “**Download**” button and select the “Wi-Fi Sharing”.

2. You will see the address where you can upload files with desktop web browser.
3. In browser choose your file and click on upload to transfer in App.

**Note:** Don't close Wi-Fi sharing view in application doing so will disconnect sharing.

## Cloud Transfer

### Transfer Files using the cloud Storage:

Recorder Pro allows two way synchronization of a multiple Files between device and online storage. With this feature you can set a single or multiple Files to sync.

To Download the Files From the DropBox, Box.net or Sugarsync Follow the step:

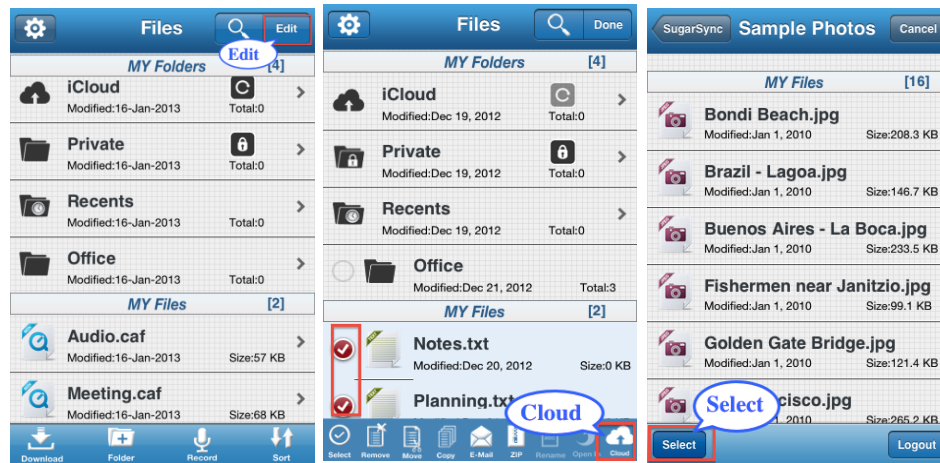

1. Tap the “**Download**” button and select the “**Cloud Storage**”.

1. Select the cloud storages from where you want to download the files. It will ask for the login if you are not logged in. After Successfully login you will get the documents List. Here we show the example of the sugar sync.
2. Tap on the Folder to get the List of the Folder.
3. Tap on the file to download and select the destination path where you want to save the file.

To Upload the Files From the DropBox, Box.net or Sugarsync Follow the step:

1. Tap the “**Edit**” button; you will see the check box listed in front of each file. Select single or multiple files and then tap “**Cloud**” from the bottom.

2. Select the cloud storage where you want to upload files.
3. After selecting the cloud storage. The Document list will be open.
4. Tap the “**Select**”, where you want to upload Files.

## Transfer Files with iCloud

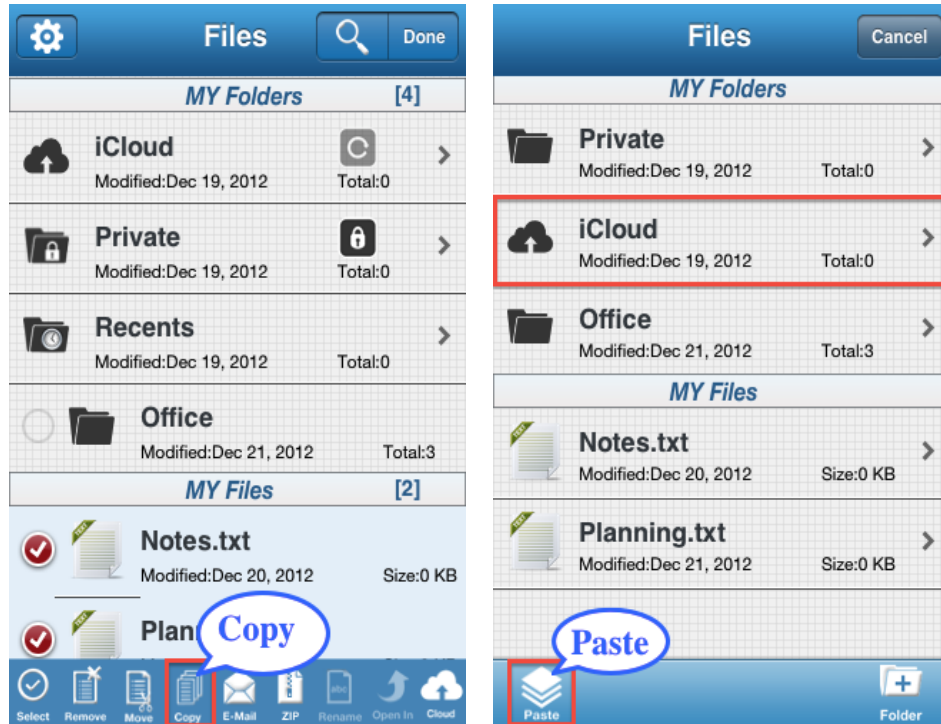

Recorder pro allows you to save the your files to the iCloud server.

**Note:** Folder will not be saved in the iCloud.

First of all is to check your iCloud setting. Go to the Setting and set up your iCloud account.

The iCloud Folder is shown in the Folder section. To save the files in the iCloud server Follow the step:

1. Tap on the “**Edit**” button. Select the multiple files and then click on the “**Copy**” button from the bottom.

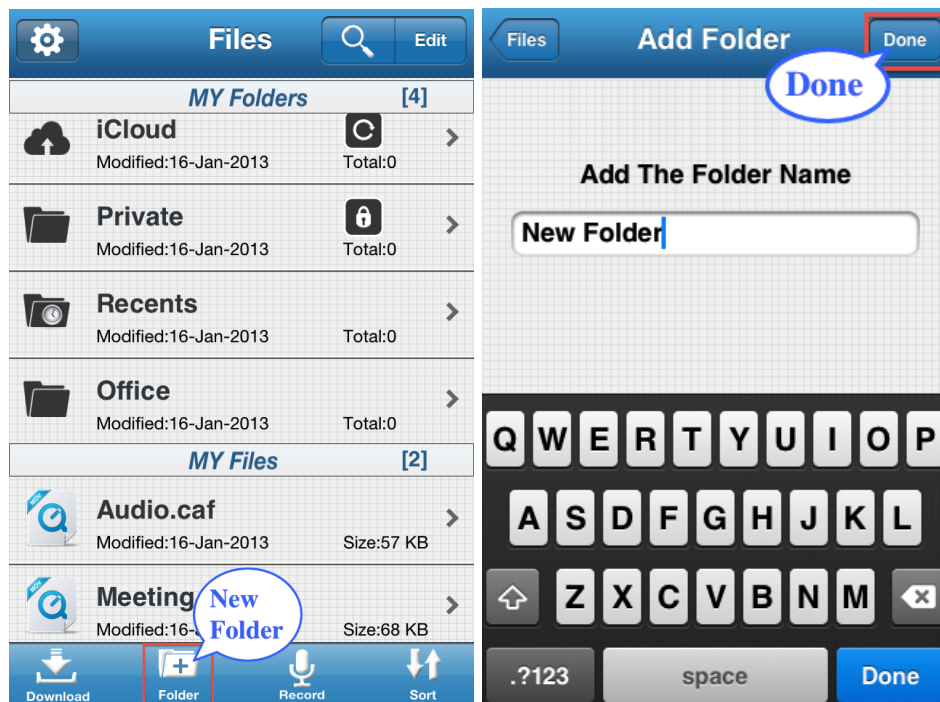

2. Go to the iCloud Folder. Press the “**Paste**” from the bottom left and file will be saved into the iCloud server

# File Management:

## 1. Create New Folders:

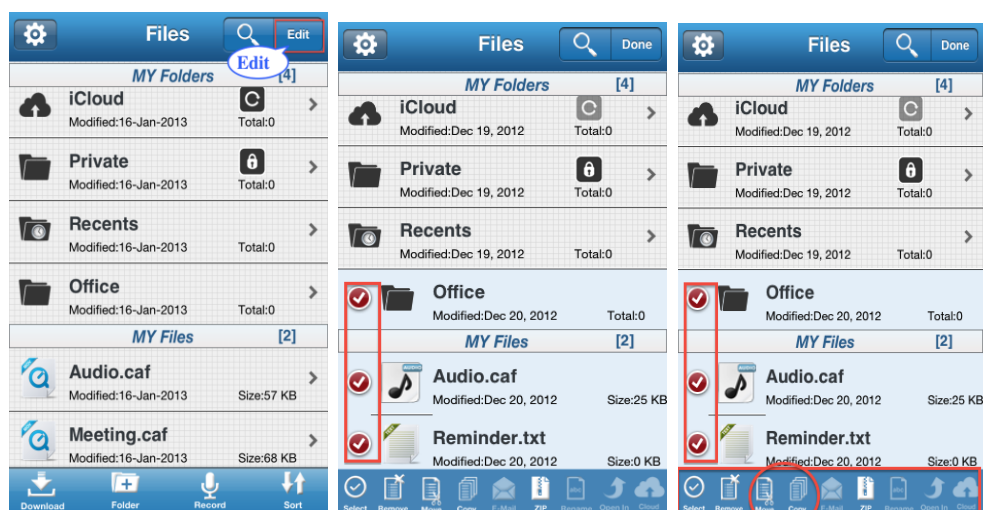

1. Tap on the Folder button from the left at bottom bar.

2. Give the new name and click on the “Done” button.
3. There are no limits for the number of folder.

## Move/copy files to the other folder

1. Tap “Edit” on the file library and you will see a check box listed in front of each file/folder.

2. Find the particular files and folder you want to manage and tap the check box next to the file.
3. You will see the options copy/move your files.
4. If you want to copy or move files to another folder, please tap 'copy' or 'move' to the list.
5. New screen will be present. Locate the target folder and tap the 'paste' from the bottom to the left.

To operate with particular file/folder the bottom bar will be operated as:

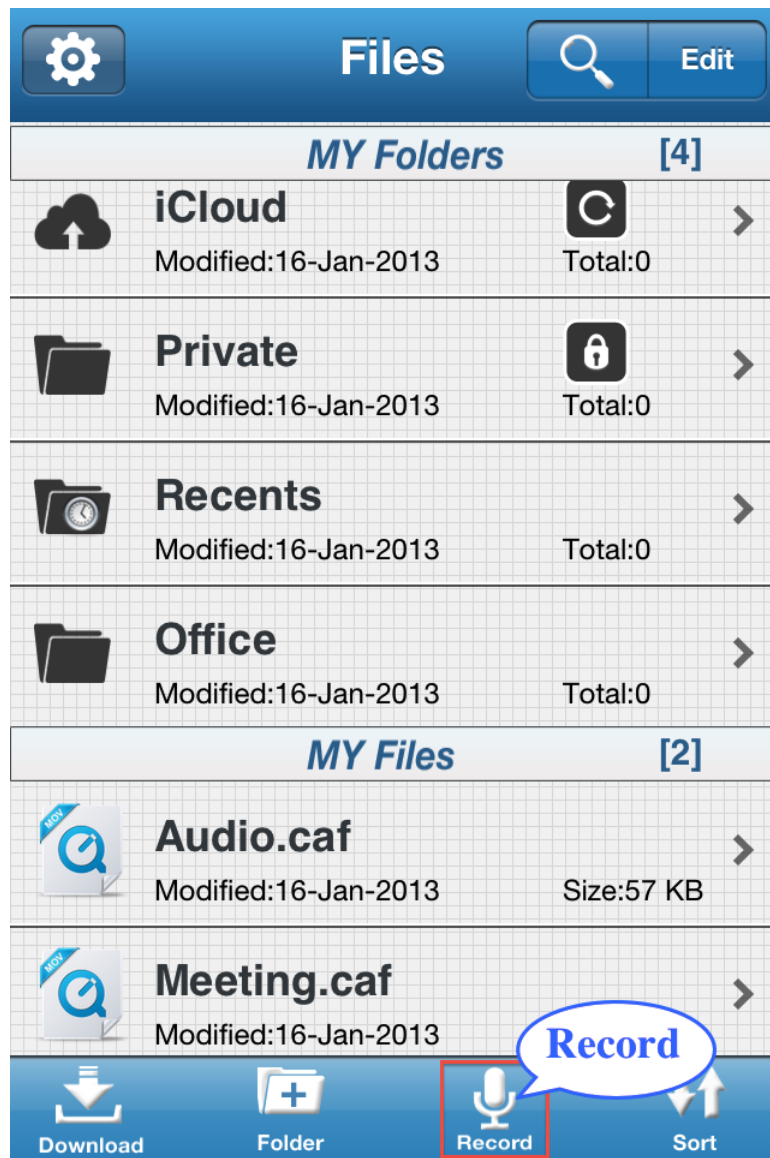

To	Do this
Select all Document	Tap “ <b>select</b> ”, all the files and folder will be selected
Remove Document	Tap “ <b>Remove</b> ”, To Delete.
Move file	Tap “ <b>Move</b> ” and choose destination folder

4. Tap on the “**RESUME**”, to resume recording.
5. Tap on the “**STOP**”, to stop recording.
6. After Recording, Tap the “**save**” to save recording

## Quality and Extension:

### Quality:

Recorder Pro allows recording with Low, Medium and High quality audio. you can change the audio quality with the following steps:

1. Tap on the “**Option**” Button From the navigation bar.
2. Select the “**Quality**” from the Audio Quality section.
3. Choose the audio quality as per your needs.

### Extension:

Recorder Pro allows you two type of extension “**caf**” and “**wav**”. To select the this two extension follow the steps:

1. Tap on the “**Option**” Button From the navigation bar.
2. Select the “**Extension**” from the File Type section.
3. Choose the Audio Type as per your needs.
4. Note: caf occupies less size compared to wav.

## Private Folder:

1. Tap on the lock icon next to the Private Folder.

2. You will be able to set the password for the private folder.
3. You can change your password in the same way.

**NOTE:** if you forget your password. Then go to the setting. Tap on the password recovery to recover your password.

# Interaction with Other Apps

## Transfer file to the other App

Recorder Pro allows you to open all your files to the other app which is able to process it. To use this feature follows the steps:

1. Tap “**Edit**”, to select the file.
2. Tap the “**Open in**” at the bottom.

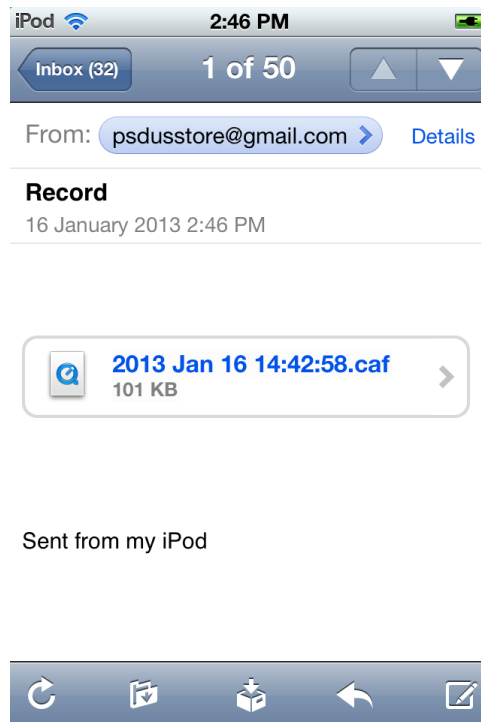

## Transfer file from the other App:

Recorder Pro allows you to store files from the other Apps installed on your device such as Mail, Safari and any other compatible App,

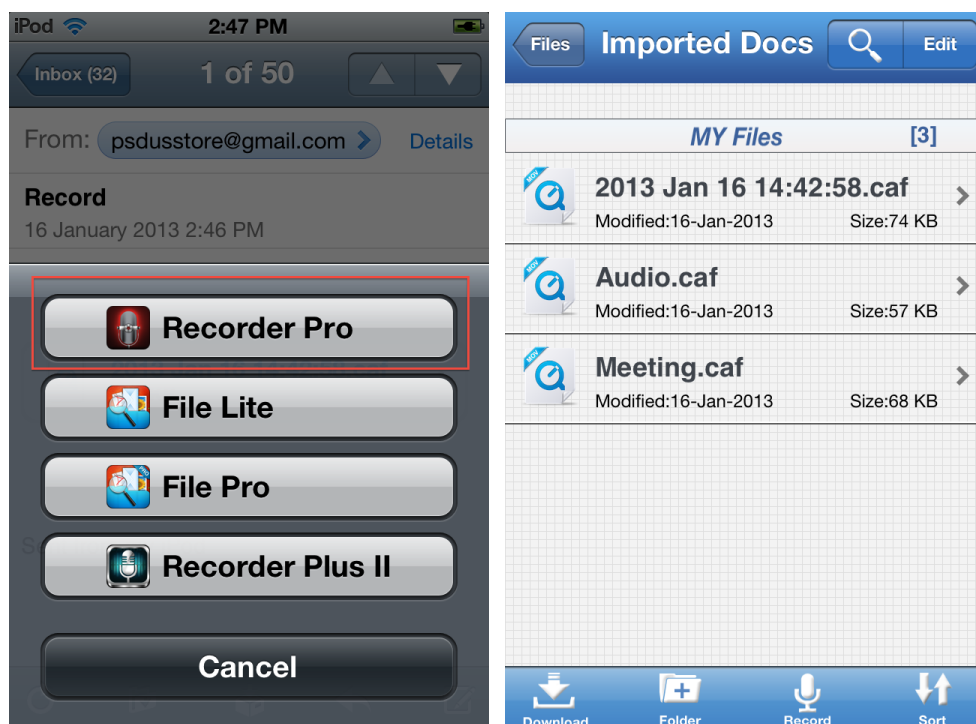

## Transfer with store Mail Attachments

Importing email attachments is easy and allows storing permanently the files for later use on the device.

1. Open the attachment in Mail once it has been totally downloaded from the mail server.
2. As the file opens in Mail's file viewer tap the action button at the top right corner, select "Open in" from the available options then choose File Pro.

3. The file appears in the "Imported Docs" folder in File. From there it could be read, shared, moved or simply stored for later (offline) use.

## Other:

### Passcode Lock:

Recorder Pro allows you to set a passcode for the File that will be required to read all your stored files. Follow the steps to set the passcode.

1. Tap the “**Option**” button on the tool bar.
2. Select the Passcode Lock where you can set and change Passcode.
3. To set the Passcode. Tap on the “**Turn Passcode On**” and set the Passcode.

### Status Bar:

Recorder Pro allows you to turn On/Off status Bar.

### Lock Orientation:

Here you can lock the Portrait/Landscape Orientation For the whole Application.
